

Week 10 assignments
 1) Role and function of Secondary market

Liquidity

The secondary market is very liquid to investors. It allows them to buy and sell securities quickly. The liquidity is crucial for investors who may need to access cash or rebalance their portfolios.

Price Discovery:

It aids in the price discovery process, where the market determines the fair value of securities based on supply and demand dynamics. Continuous trading helps to reflect the current market conditions.

Investment opportunities:

IMPORTANT NOTES

It provides opportunities for various investors to enter and exit the market at different times and prices.
